J.P. Morgan Asset Management – London – UK Product Team, NAV & Valuation Oversight, Associate

Dear Hiring Team,

I am applying for the NAV & Valuation Oversight Associate role in the UK Product Team. Overseeing fund valuations, preparing MI for governance committees and coordinating with administrators, depositaries and auditors is close to the work I did on the management company side in Luxembourg, and I would like to build on it in a UK fund range.

At AManco, a EUR 10 billion AIFM, I monitored the valuations of private equity, real estate, private debt and fund-of-funds portfolios, checked exposure, leverage and liquidity data from portfolio managers, administrators and risk for AIFMD Annex IV reporting, and produced quarterly reports for the Board. At UBS Fund Administration Services I worked with fund accounting on private equity and real estate funds, reconciling investor positions and validating more than 100 Partners' Capital Account statements against fund documents to fixed deadlines. At Triton Partners I now prepare board and committee papers and coordinate sign-offs across directors, auditors, depositaries, law firms and banks, including fund and SPV events and more than 15 incorporations end to end. I also designed and built an AI tool, now used daily by the team, that compiles, converts and files governance documents in one run, and I would bring the same improvement mindset to your oversight controls and procedures. I am keen to deepen my knowledge of UK UCITS, OEICs and investment trusts. I hold an engineering degree from IIT and a Master in Management from EDHEC Business School.

I am a non-EU national and would require Skilled Worker visa sponsorship; I am available immediately and ready to relocate to London.

Yours sincerely,
Raman Yadav
