PGIM – London – Associate, Product Data & Analytics (PGIM Product)

Dear Hiring Team,

I am applying for the Associate, Product Data & Analytics role in PGIM Product in London. Making sure the data behind client and RFP reporting is accurate, retrievable and delivered quickly, and automating how it is produced, is exactly the kind of work I enjoy.

At AManco, a EUR 10 billion AIFM, I gathered and reconciled portfolio, valuation and exposure data from portfolio managers, administrators and risk for AIFMD Annex IV reporting, and produced quarterly portfolio reports for the Board across private equity, real estate, private debt and fund-of-funds strategies. At UBS Fund Administration Services I handled investor data for private equity and real estate funds, answered investor queries and validated more than 100 Partners' Capital Account statements to fixed deadlines. At Triton Partners I coordinate deliverables across directors, banks, auditors and law firms, and I designed and built an AI tool, now used daily by the team, that compiles, converts and files governance documents in one run. I would bring the same focus on data integrity and automation to your performance reporting, RFP data and consultant database work. I hold an engineering degree from IIT and a Master in Management from EDHEC Business School, and I use Excel daily for data work and reporting.

I am a non-EU national and would require Skilled Worker visa sponsorship; I am available immediately and ready to relocate to London.

Yours sincerely,
Raman Yadav
