**KKR – London – Real Assets Product Analyst, Global Client Solutions**

Dear Hiring Team,

I am applying for the Real Assets Product Analyst role in KKR's Global Client Solutions team in London. Coordinating investor deliverables for real estate and private markets funds, and making the reporting behind them faster and more reliable, is the work I have done so far and want to keep building on.

At UBS Fund Administration Services I worked in transfer agency for private equity and real estate funds: I processed capital calls, distributions and transfers, answered investor queries and validated more than 100 Partners' Capital Account statements against fund documents to fixed deadlines. At AManco, a EUR 10 billion AIFM, I monitored real estate, private equity, private debt and fund-of-funds portfolios, consolidated data from portfolio managers and administrators for AIFMD Annex IV reporting and produced quarterly reports for the Board. At Triton Partners I now coordinate deliverables across directors, banks, auditors and law firms for a large portfolio of Luxembourg fund and holding entities, and I designed and built an AI tool, now used daily by the team, that compiles, converts and files governance documents in one run. I would bring the same focus on accuracy and efficiency to your quarterly investor reporting, due diligence materials and fund data. I hold an engineering degree from IIT and a Master in Management from EDHEC Business School.

I am a non-EU national and would require Skilled Worker visa sponsorship; I am available immediately and ready to relocate to London.

Yours sincerely,
Raman Yadav
