PIMCO – London – Account Analyst, Middle East

Dear Hiring Team,

I am applying for the Account Analyst role supporting PIMCO's Middle East and Africa team in London. Preparing accurate client and portfolio reports to fixed deadlines, and automating the process behind them, is what I enjoy most, and I would like to do it for institutional clients such as central banks and sovereign funds.

At AManco, a EUR 10 billion AIFM, I prepared quarterly portfolio reports for the Board covering performance, valuations and exposures across private equity, real estate, private debt and fund-of-funds portfolios, and consolidated leverage, liquidity and risk data for AIFMD Annex IV reporting. At UBS Fund Administration Services I reconciled investor positions, answered investor queries and validated more than 100 Partners' Capital Account statements to fixed deadlines. At Triton Partners I designed and built an AI tool, now used daily by the team, that compiles, converts and files governance documents in one run, and I would bring that automation mindset, together with strong Excel skills, to your client reporting and attribution work. My engineering degree from IIT gave me a solid quantitative base, and my Master in Management from EDHEC Business School covered fixed income, derivatives and portfolio management. I am keen to deepen my knowledge of fixed income markets and private assets.

I am a non-EU national and would require Skilled Worker visa sponsorship; I am available immediately and ready to relocate to London.

Yours sincerely,
Raman Yadav
