Moneyfarm – London – Junior Middle Office Analyst

Dear Hiring Team,

I am applying for the Junior Middle Office Analyst role supporting Moneyfarm's new trading team in London. The mix of reconciliations, settlement follow-up and automating operational workflows is exactly where I want to build my career, and it matches both my engineering background and my fund operations experience.

At UBS Fund Administration Services I worked in transfer agency for private equity and real estate funds: I processed subscriptions, capital calls, distributions and transfers, reconciled investor cash and positions against fund records, investigated breaks with other teams and validated more than 100 Partners' Capital Account statements to fixed deadlines. At AManco, a EUR 10 billion AIFM, I monitored portfolio events and valuations, prepared inputs for AIFMD Annex IV reporting and produced quarterly reports for the Board, which gave me a good working view of how front, middle and back office fit together. At Triton Partners I now coordinate sign-offs across directors, banks, auditors and law firms, and I designed and built an AI tool, now used daily by the team, that compiles, converts and files governance documents in one run. I enjoy turning manual, error-prone steps into reliable scripted processes, and I would bring that mindset to your Python and SQL monitoring tools, TCA reporting and Best Execution packs. I hold an engineering degree from IIT and a Master in Management from EDHEC Business School, and I use Excel daily for data work and reporting.

I am a non-EU national and would require Skilled Worker visa sponsorship for London; I am available immediately and ready to relocate.

Yours sincerely,
Raman Yadav
