ARHS Group (Accenture) – Business Analyst - Debt & Equity

Dear Hiring Team,

The equity track of your Business Analyst – Debt & Equity role asks for alternative investment fund experience, portfolio monitoring and investor reporting, all of which I have done in Luxembourg. At UBS Fund Administration Services, I processed subscriptions, redemptions, capital calls and distributions for private equity and real estate funds, and prepared and validated more than 100 Partners' Capital Account (PCAP) statements and capital activity notices against fund offering documents.

At AManco, Arendt's AIFM, I monitored assets and analysed valuation reports for five funds, produced quarterly portfolio and valuation reports for the Board, and supported AIFMD Annex IV reporting using MS Access and SQL.

The role also covers user adoption and change. At Triton, I built an AI tool that compiles, converts and files governance documents in one run; the whole team uses it daily, and I drove the team's adoption of Claude, Copilot and Glean. At Arendt, I contributed to the design and implementation of SARA, an AML/CTF risk-assessment tool that cut review time by 40%, and spent a month on secondment at a client site. Formal UAT is the skill I want to add next.

ARHS, now part of Accenture, runs complex public sector IT projects, and this role sits on site with the client. I would bring fund operations experience and an EDHEC Master in Management focused on Private Equity & Venture Capital. I would welcome a conversation.

Kind regards,
Raman Yadav
