Apex Group (FundRock LIS) – Valuation Officer

Dear Hiring Team,

I am applying for the Valuation Officer role at FundRock LIS, Apex Group's third-party UCITS management company and AIFM. At AManco, Arendt's AIFM with EUR 10 billion under management, I monitored assets and analysed valuation reports for five funds, producing quarterly portfolio and valuation reports for the Board. That mirrors the periodic valuation reviews and fund board reporting in this role.

At AManco I also supported AIFMD Annex IV reporting using MS Access and SQL, and evaluated 20+ investment recommendations across private equity, real estate, private debt and co-investments, presenting findings to the Investment Committee. At UBS Fund Administration Services, working on private equity and real estate funds, I prepared and validated 100+ PCAP statements and capital activity notices against fund offering documents, delivering them on time.

Your posting also asks for regular review of risk management and valuation processes. I improve the processes I work in: at Triton, I designed and built an AI tool that compiles, converts and files governance documents in one run, now used daily by the whole team. Risk modelling is where I most want to grow, and I am studying for CFA Level I.

FundRock's focus on private equity, real estate, infrastructure and debt matches the asset classes I have worked on. I hold a Master in Management from EDHEC, focused on financial services and private equity, and would welcome a conversation.

Kind regards,
Raman Yadav
