**Bank of China (Europe) S.A. – Operational Risk Management Associate**

Dear Bank of China Europe Recruitment Team,

I am applying for the Operational Risk Management Associate position in your second line of defence in Luxembourg. The role combines risk data, controls and automation, which is the work I have enjoyed most in my Luxembourg internships, and I would like to build my career in risk management in a bank.

At Arendt Regulatory & Consulting I worked in AML/CTF advisory, performing PEP screenings and AML checks on more than 50 individual and institutional investors and escalating high-risk cases for review. I also contributed to the design and implementation of SARA, Arendt's AML/CTF risk-assessment tool, which cut review time by 40%. That work taught me how a risk assessment is structured, how evidence is documented and why data has to be checked before it is reported. At AManco, Arendt's AIFM, I supported AIFMD Annex IV regulatory reporting using MS Access and SQL, and produced quarterly portfolio and valuation reports for the Board, so I am used to working accurately with large datasets under reporting deadlines.

At UBS Fund Administration Services I set up more than 150 investor records during the Credit Suisse–UBS migration and validated more than 100 Partners' Capital Account statements against fund offering documents, which meant finding and following up inconsistencies before anything reached investors. In my current role at Triton Investments Management SARL, a private equity firm, I designed and built an AI automation tool that compiles, converts and files governance documents in one run; the whole team now uses it daily instead of formatting and filing by hand. I would like to bring the same approach to automating report production and recurring data checks in your team.

I have about two and a half years of experience from internships at a private equity firm, a fund administrator, a consultancy and an AIFM. I hold a Master in Management (Grande École) from EDHEC Business School, graduated in November 2025, and a Bachelor of Technology from the Indian Institute of Technology, which included mathematics. I am fluent in English with beginner French and German; I do not speak Chinese. I am available immediately. I live in Thionville on a French residence permit and have already worked in Luxembourg during my internships, so no relocation or visa from abroad is involved. As a non-EU national I would need the Bank's support for a Luxembourg work authorisation as a cross-border worker.

I would welcome the opportunity to discuss the role.

Yours sincerely,
Raman Yadav
