Deloitte Luxembourg – Regulatory Risk Reporting Analyst - Investment Funds

Dear Hiring Team,

I am applying for the Regulatory Risk Reporting Analyst – Investment Funds role in Deloitte Luxembourg's Capital Markets team. My closest match is regulatory reporting: at AManco, Arendt's AIFM with EUR 10 billion in AUM, I supported AIFMD Annex IV reporting using MS Access and SQL and produced quarterly portfolio and valuation reports for the Board on five funds.

Data validation, core to this role, has been central to my fund work. At UBS Fund Administration Services I prepared and validated more than 100 Partners' Capital Account statements and capital activity notices against fund offering documents, delivered on time.

The role's process design also appeals to me. At Arendt I contributed to the design and implementation of SARA, an AML/CTF risk-assessment tool that cut review time by 40%. At Triton Investments Management I built an AI tool that compiles, converts and files governance documents in one run, used daily by the whole team, and an investor tracker refreshed daily from the internal deal database.

Your IM and PERE focus fits my experience across private equity, real estate and private debt funds. I hold a Master in Management from EDHEC and a BTech from IIT Palakkad, and I am studying for CFA Level I. I am keen to build expertise in CRR III and Solvency II.

I would welcome the chance to discuss how I could support your clients' risk transparency reporting.

Kind regards,
Raman Yadav
