JPMorganChase – Fund Servicing Analyst

Dear Hiring Team,

I am applying for the Fund Servicing Analyst role in JPMorganChase's Fund Servicing Operations team in Senningerberg. Executing fund servicing transactions accurately is the core of the role, and it is what I did for nine months at UBS Fund Administration Services, processing subscriptions, redemptions, capital calls and distributions for private equity and real estate funds.

At UBS I also prepared and validated more than 100 Partners' Capital Account statements and capital activity notices against fund offering documents, delivering them on time, and set up 150+ investor records during the Credit Suisse–UBS migration. Earlier, at AManco, Arendt's AIFM, I supported relationships with eight institutional clients, coordinating fund industry teams across private equity, real estate and infrastructure funds.

Your posting asks for continuous improvement, and that is where I add most. At Triton Investments Management I designed and built an AI tool that compiles, converts and files governance documents in one run; the whole team now uses it daily in place of manual formatting and filing. At Arendt Regulatory & Consulting I contributed to the design and implementation of SARA, Arendt's AML/CTF risk-assessment tool, which cut review time by 40%.

A role that pairs accurate daily execution with process improvement, within JPMorganChase's Commercial & Investment Bank, is the combination my experience at UBS, Arendt and Triton has prepared me for. I would welcome the opportunity to discuss it.

Kind regards,
Raman Yadav
