Palana – Business & Data Analyst

Dear Hiring Team,

I am applying for the Business & Data Analyst role at Palana. The closest match to my experience is regulatory reporting: at AManco, Arendt's AIFM, I supported AIFMD Annex IV reporting using MS Access and SQL and produced quarterly portfolio and valuation reports for the Board.

Your posting stresses validating figures and investigating data inconsistencies. At UBS Fund Administration I prepared and validated 100+ Partners' Capital Account statements and capital activity notices against fund offering documents, and set up 150+ investor records in the CRM during the Credit Suisse–UBS migration. At Triton I built a central investor tracker, refreshed daily from the internal deal database, that reports investor and ownership changes by entity.

The role also involves analysing business processes and requirements and helping turn them into working solutions. At Arendt I contributed to the design and implementation of SARA, an AML/CTF risk-assessment tool that cut review time by 40%, and at Triton I designed and built an AI tool that compiles, converts and files governance documents in one run, now used daily by the whole team.

Palana's specialisation in the investment fund and banking industry is where my Luxembourg experience lies, across AIFM reporting, AML advisory, fund administration and corporate governance. With an EDHEC Master in Management and an IIT engineering degree, I am keen to deepen my SQL and reporting skills with coaching from your team.

Kind regards,
Raman Yadav
