PwC Luxembourg – Financial Crime Compliance Consultant

Dear Hiring Team,

I am applying for the Financial Crime Compliance Consultant role at PwC Luxembourg. My closest match is my AML/CTF Advisory internship at Arendt Regulatory & Consulting, where I performed PEP screenings and AML checks on 50+ individual and institutional investors, including a one-month secondment at a client site, and escalated high-risk entities for review.

That experience also maps to your risk-assessment and tool-implementation work. I contributed to the design and implementation of SARA, Arendt's AML/CTF risk-assessment tool, which cut review time by 40%.

My later roles kept me close to investor and ownership data. At UBS Fund Administration Services, I set up 150+ investor records during the Credit Suisse–UBS migration and validated 100+ Partners' Capital Account statements and capital activity notices against fund offering documents. At Triton Investments Management, I built an AI tool the governance team uses daily to compile and file documents, and an investor tracker that reports ownership changes by entity. I would bring that experience to the client dashboards you prepare and the compliance tools you implement.

PwC's Financial Crime Compliance team is expanding and contributing to new service offerings, and I want to grow in a practice where risk assessments, due diligence and tool implementation sit together. I hold an EDHEC Master in Management, work comfortably in SQL and AI tools, and am keen to build my French and German.

Kind regards,
Raman Yadav
