Utmost Luxembourg S.A.
Investment Administration – Findel
Re: Asset Oversight Analyst

Dear Utmost Luxembourg Recruitment Team,

I am applying for the Asset Oversight Analyst position in your Investment Administration team. Checking that the instruments held under unit-linked contracts are eligible, that external asset managers stay within the investment rules set by the Commissariat aux Assurances and the home and host regulators, and that breaches are reported and followed up to closure is the oversight side of the work I did at AManco, Arendt's management company, and I would like to make it my first permanent role.

At AManco I monitored assets and analysed valuation reports for five private equity, real estate, private debt and infrastructure funds, produced quarterly portfolio and valuation reports for the board and supported AIFMD Annex IV regulatory reporting with MS Access and SQL. I evaluated more than 20 investment recommendations for the Investment Committee, which meant reading the fund documents for investment restrictions and limits before a decision was taken, so reviewing investment profiles and strategy letters against a client's risk profile is familiar ground. At UBS Fund Administration Services I validated more than 100 capital account statements against fund documents and set up more than 150 investor records during the Credit Suisse and UBS migration, work that depends on accuracy under deadline pressure. At Arendt Regulatory & Consulting I performed PEP screenings and AML checks on more than 50 individual and institutional investors and contributed to the design of the firm's AML/CTF risk-assessment tool, which gave me a working knowledge of Luxembourg AML rules and of how a control is documented. In my current internship at Triton Investments Management SARL I build the Excel and AI automation tools my team uses daily, including a daily investor tracker fed from the deal database, and I would bring the same approach to your monthly and quarterly breach reporting.

I hold a Master in Management (Grande École) from EDHEC Business School, graduated in November 2025 with a focus on financial services, corporate finance and private equity, and a Bachelor of Technology from the Indian Institute of Technology, with mathematics among my majors. PRIIPs, EMIR, MAR and the Commissariat aux Assurances investment rules are regulations I would learn the way I learned AIFMD reporting, by working on the data behind

them. I work at an advanced level in Excel and I am proficient in SQL. I am fluent in English with beginner French and German, available at short notice, and as a non-EU national living in Thionville I would need Utmost's support for a Luxembourg work permit, which I have indicated in your application form.

I would welcome the opportunity to discuss the role.

Yours sincerely,
Raman Yadav
