**Banque Internationale à Luxembourg (BIL) – Data Governance Officer**

Dear BIL Recruitment Team,

I am applying for the Data Governance Officer position. Supporting the implementation of BIL's Data Governance framework and BCBS 239, maintaining metadata, ownership and lineage, and using Microsoft 365, Power BI, Copilot and AI-enabled automation to improve governance processes matches both my technical background and the financial and regulatory data I have worked with in Luxembourg.

I hold a Bachelor of Technology from the Indian Institute of Technology and a Master in Management (Grande École) from EDHEC Business School. At AManco, Arendt's AIFM, I supported AIFMD Annex IV regulatory reporting with the risk team using SQL and produced the quarterly portfolio and valuation reports for the Board, so I know how regulatory data is sourced, transformed and checked before it reaches a supervisor. At UBS Fund Administration Services I set up more than 150 investor records and their static data in UBS's CRM during the Credit Suisse–UBS migration and validated more than 100 capital account statements, which is very concrete data-quality and completeness work.

In my current role at Triton Investments Management SARL, a private equity firm, I designed and built an AI automation tool that compiles, converts and files governance documents in one run; the whole team now uses it daily, and I drove the team's adoption of Claude, Copilot and Glean. At Arendt Regulatory & Consulting I contributed to SARA, an AML/CTF risk-assessment tool that cut review time by 40%. I enjoy improving and automating controls and documenting them so they hold up for audit.

I am fluent in English, with beginner French and German. I live in Thionville and already work in Luxembourg; as a non-EU national I would need BIL's support for a Luxembourg work authorisation as a cross-border worker.

I would welcome the opportunity to discuss the role.

Yours sincerely,
Raman Yadav
