Goldman Sachs – London – Asset & Wealth Management, Platform Management Analyst

Dear Hiring Team,

I am applying for the Platform Management Analyst role in the Alternatives Portfolio Management Group. Capital activity, fund structures and investor reporting across private market funds are where my experience lies, and I would like to apply it on the portfolio management side.

At UBS Fund Administration Services I worked on private equity and real estate funds, processing capital calls, distributions and transfers, reconciling investor cash and positions and validating more than 100 Partners' Capital Account statements to fixed deadlines. At AManco, a EUR 10 billion AIFM, I monitored private equity, real estate, private debt and fund-of-funds portfolios, tracked performance and valuations, prepared inputs for AIFMD Annex IV reporting and produced quarterly reports for the Board. At Triton Partners I now support the governance of a large portfolio of Luxembourg fund and holding entities, coordinating approvals across directors, auditors, law firms and banks for transactions and more than 15 incorporations end to end, and I designed and built an AI tool, now used daily by the team, that compiles, converts and files governance documents in one run. I would bring the same analytical, technology-minded approach to liquidity forecasting, allocations and performance reporting. I hold an engineering degree from IIT and a Master in Management from EDHEC Business School.

I am a non-EU national and would require Skilled Worker visa sponsorship; I am available immediately and ready to relocate to London.

Yours sincerely,
Raman Yadav
