J.P. Morgan – London – Trade Attribution & Client Book of Record Support Analyst, Asset Management Operations

Dear Hiring Team,

I am applying for the Trade Attribution & Client Book of Record Support Analyst role in Asset Management Operations. Reconciling records, finding the root cause of breaks and turning manual checks into reliable processes is the work I enjoy most, and this role puts it at the centre.

At UBS Fund Administration Services I worked in transfer agency for private equity and real estate funds: I processed subscriptions, capital calls, distributions and transfers, reconciled investor cash and positions against fund records, investigated breaks with other teams and validated more than 100 Partners' Capital Account statements to fixed deadlines. At AManco, a EUR 10 billion AIFM, I gathered and reconciled portfolio, valuation and exposure data from portfolio managers, administrators and risk for AIFMD Annex IV reporting, and produced quarterly reports for the Board. At Triton Partners I now coordinate sign-offs across directors, banks, auditors and law firms, and I designed and built an AI tool, now used daily by the team, that compiles, converts and files governance documents in one run. My engineering degree from IIT gave me a strong quantitative base, I use Excel daily for data work and reporting, and I would bring an automation-first mindset to your controls, exception management and reporting. I also hold a Master in Management from EDHEC Business School.

I am a non-EU national and would require Skilled Worker visa sponsorship; I am available immediately and ready to relocate to London.

Yours sincerely,
Raman Yadav
