Janus Henderson Investors – London – Derivatives Documentation and Integration Analyst

Dear Hiring Team,

I am applying for the Derivatives Documentation and Integration Analyst role. Taking a new entity or arrangement from first request to operational readiness, while tracking every approval, document and dependency, is a large part of what I do today.

At Triton Partners I coordinate sign-offs across directors, banks, auditors and law firms for a large portfolio of Luxembourg entities, including more than 15 incorporations end to end, keeping documents, approvals, bank account openings and statutory records on track against target dates. I also designed and built an AI tool, now used daily by the team, that compiles, converts and files governance documents in one run. At Arendt Regulatory & Consulting I worked on AML/KYC and CTF reviews for financial-sector clients, and at UBS Fund Administration Services I handled investor onboarding, KYC documentation and reconciliations for private equity and real estate funds. At AManco, a EUR 10 billion AIFM, I worked with portfolio managers, administrators and risk on AIFMD reporting. I would bring this organised, controlled approach to your onboarding pipelines and documentation negotiations, and I am keen to build technical expertise in ISDA, CSA and GMRA documentation. I hold a Master in Management from EDHEC Business School and an engineering degree from IIT.

I am a non-EU national and would require Skilled Worker visa sponsorship; I am available immediately and ready to relocate to London.

Yours sincerely,
Raman Yadav
