Deloitte Tax & Consulting (Luxembourg) – Analyst – Private Market Investment Management – Operational Excellence

Dear Deloitte Recruitment Team,

I am applying for the Analyst position in your Alternatives Investment Management – Operational Excellence team, starting in January 2027 (Req ID 14230). I have spent my internships inside private market operations, at a private equity firm, a fund administrator and an AIFM, and I have already redesigned one of those processes with AI. Helping private equity, real estate, private debt and infrastructure managers improve their operating models is exactly the work I want to do next.

At UBS Fund Administration Services I worked in private assets fund administration for PE and RE funds, processing subscriptions, redemptions, capital calls and distributions, and preparing and validating more than 100 Partners' Capital Account statements against fund documents. I also set up more than 150 investor records in UBS's CRM during the Credit Suisse–UBS migration, which showed me how data, systems and controls fit together in a large operational change. At AManco, Arendt's AIFM, I monitored five funds across PE, RE and fund-of-funds strategies, produced quarterly portfolio and valuation reports for the Board, supported AIFMD Annex IV reporting with MS Access and SQL, and presented more than 20 PE, RE, private debt and co-investment deals to the Investment Committee.

In my current internship at Triton Investments Management SARL, a private equity firm, I support board governance across a large portfolio of Luxembourg entities and handled the incorporation of more than 15 entities. I reviewed our governance-document workflow and built an AI tool, now used daily by the whole team, that compiles, converts and files documents in one run, and I drove the team's adoption of Claude, Copilot and Glean while keeping outputs checked and compliant. At Arendt Regulatory & Consulting I contributed to the design and implementation of SARA, an AML/CTF risk-assessment tool that cut review time by 40%, which gave me first-hand experience of gathering requirements and turning them into a working solution.

I hold a Master in Management (Grande École) from EDHEC Business School, with a focus on financial services, corporate finance and private equity, and a Bachelor of Technology from the Indian Institute of Technology. I am comfortable with Excel, PowerPoint and SQL, and keen to learn platforms such as eFront, Yardi or Allvue. I am fluent in English, with beginner French and German, and I can start in January 2027 or earlier. I live in Thionville on a French residence permit and have already worked in Luxembourg, so no relocation is involved. As a non-EU national I would need Deloitte's support for a Luxembourg work authorisation as a cross-border worker.

I would welcome the opportunity to discuss the role.

Yours sincerely,
Raman Yadav
