Deloitte Tax & Consulting (Luxembourg) – Analyst – Business Transformation, Investment Management

Dear Deloitte Recruitment Team,

I am applying for the Analyst position in your Business Transformation – Investment Management team (Req ID 14259). Helping management companies, central administrations and depositaries rethink their operations, review processes and respond to regulation is work I have seen from the inside at each of these types of firm, and consulting is where I want to put that experience to use.

At Arendt Regulatory & Consulting I worked in AML/CTF advisory, performing AML/KYC checks and PEP screenings on more than 50 investors and contributing to the design and implementation of SARA, Arendt's AML/CTF risk-assessment tool, which cut review time by 40%. That project taught me how to turn a regulatory requirement into a working process and tool. At AManco, Arendt's AIFM, I saw a management company's operations first-hand: I monitored five funds, produced quarterly portfolio and valuation reports for the Board, supported AIFMD Annex IV reporting with MS Access and SQL, and presented more than 20 investment recommendations to the Investment Committee. At UBS Fund Administration Services, a central administrator, I processed investor activity for private equity and real estate funds and set up more than 150 investor records in UBS's CRM during the Credit Suisse–UBS migration, a large operational integration project.

In my current internship at Triton Investments Management SARL, a private equity firm, I support board governance across a large portfolio of Luxembourg entities and handled the incorporation of more than 15 entities. I also reviewed our governance-document workflow and built an AI tool, now used daily by the whole team, that compiles, converts and files documents in one run, and I drove the team's adoption of Claude, Copilot and Glean. Process efficiency reviews and target operating model work are a natural next step from this.

I hold a Master in Management (Grande École) from EDHEC Business School, with a focus on financial services and corporate finance, and a Bachelor of Technology from the Indian Institute of Technology, which gave me a strong analytical and problem-solving base. I have about two and a half years of experience from internships at a private equity firm, a fund administrator, a consultancy and an AIFM. I am fluent in English, and my French and German are at beginner level; I am working to improve them and am comfortable working in international teams. I am available immediately. I live in Thionville on a French residence permit and have already worked in Luxembourg, so no relocation is involved. As a non-EU national I would need Deloitte's support for a Luxembourg work authorisation as a cross-border worker.

I would welcome the opportunity to discuss the role.

Yours sincerely,
Raman Yadav
